

**Registered Company:** A Plus Students South Africa (Pty) Ltd.

**Registration Number:** 2014/074214/17

**Managing Director:** MM Mouton

### About A+ Students

**A+ Maths** is a unique program designed to make mathematics engaging, practical, and fun! We teach the **abacus technique** for fast and accurate mental calculations — a proven method that enhances both **left and right brain development** through tactile, visual, and practical learning.

Along with abacus training, we cover all **CAPS-related mathematics concepts** using games and interactive activities that make every lesson exciting and easy to understand.

### Children will learn:

- Fine and gross motor skills
- Writing, tracing, and speed writing (or tables, depending on age)
- Abacus lessons
- Book work to apply concepts learned
- CAPS-aligned games and activities
- Flashcards and memory games for visual recall
- Brain gym exercises

### Why choose A+ Students?

Our program is ideal for **all learners** — whether your child is struggling with mathematics or excelling beyond grade level.

Small class sizes ensure **individual attention**, allowing each child to work at their own pace.

We focus on **understanding concepts** instead of repetition, helping learners build **confidence and a genuine love for maths**.
