

What is A+ Students about:

A+ Maths is a unique program where we teach the abacus technique for accurate and fast calculations. Using an abacus is practical, tactile as well as visual, this enhances the left and right brain connectivity and ensures that mathematics is not only a one-dimensional concept. We also cover all CAPS related mathematic concepts in easy-to-understand games and activities, making classes interactive, exciting, and fun.

- Fine motor skills
- Gross motor skills
- Writing/tracing/speed writing or tables depending on age.
- Abacus lessons
- Book work (apply the lesson taught)
- CAPS concepts as games
- Flashcards/memory games to enhance visual recall.
- Brain gym activities

The course is well suited for both children struggling in mathematics as well as those that excel. Children can work at their own pace within the class structure as class numbers are limited to ensure quality and attention. We focus on relating concepts rather than repetition, building confidence and creating a LOVE for mathematics.

To enrol for 2024, please use the **GOOGLE FORM to submit an electronic form** and create your profile on our system, use the link – <https://forms.gle/GQsQ9BUeS8JyDGMN6>
